## Heavy Horse Growth Monitoring and Feeding Chart

To determine the optimal range in pounds per day of ProElite® Grass Advantage or ProElite Alfalfa Advantage please use the chart to the right.

1. Determine the individual body weight of your horse.
2. Determine the age of your horse in months.

Follow the lines over and up and the numbers inside each shaded area where they cross is your recommended feeding rate and their Safe Upper Limit (SUL) to be fed per day.
